## **RADinfo Systems Unveils CD PowerPACS, the First Product to Distribute DICOM Images with Patient Records on One CD**

**This affordable, portable PACS product can replace imaging centers' laser film**

Herndon, VA, October 1, 2001 – PACS & Teleradiology solutions provider, RADinfo Systems™, today unveiled the first product to cost-effectively distribute DICOM images with patient medical records on one CD, called CD PowerPACS™. The new product is aimed at eliminating the expensive and time-consuming process of producing films, reports, and records.

“CD PowerPACS is the first product to produce CDs that combine full-fidelity, diagnostic quality images with patient records and medical reports,” explains Dr. Chen-Tai Ma, President and CEO of RADinfo Systems. “We have seen a great demand for this solution and already have many systems on order. The CDs contain our FDA-approved DICOM viewer, which has been used by our customers and refined by our engineers over the last six years – so it’s very intuitive for first time users. It is also important to mention that CD PowerPACS software is entirely created by RADinfo Systems. Therefore, we have a long-term growth plan for future product development based on evolving customer needs.”

### **About CD PowerPACS**

CD PowerPACS is a low cost, simple solution to create CDs containing diagnostic quality images, medical reports and patient records. End users can view the CD on any Microsoft Windows PC without loading additional software because a DICOM viewer is included. The graphic user interface is designed with the end user in mind, thereby easing the transition from reading analog films to reviewing digital images. CD PowerPACS connects to all DICOM modalities, image servers, image workstations and film digitizers to retrieve DICOM image studies. It records full CDs in minutes and prints the customer’s facility logo and unique study identifiers on each CD. The self-starting CDs are viewable on any Windows 95-2000 computer.

### **Pricing and Availability**

RADinfo Systems CD PowerPACS is available now for purchase in U.S. and international markets with list prices starting at US\$20,000. The list price includes maintenance and 24x7 support for the first year. Solutions range from CD PowerPACS 80, 100, 1000, 2000, 3000, and 3500, meeting the needs of small imaging clinics through large enterprise healthcare systems.
